

# FortiToken™ Cloud

Available in

Cloud

## Highlights

- Centrally manage MFA for FortiGate
- Simplify administration and deployment, increase ease of use
- No additional hardware or software required
- Ease of provisioning for increased demand

## Multifactor Authentication Made Easy

With cloud management and user-friendly FortiToken Mobile Tokens included, FortiToken Cloud includes everything you need to implement multifactor in your FortiGate, FortiAuthenticator, FortiPAM, and several other Fortinet products, as well as any web applications that can call the FortiToken Cloud API.

Many of today's most damaging security breaches have been due to compromised user accounts and passwords. Businesses of all sizes are looking to move beyond passwords alone to authenticate users. Multifactor authentication, whether with traditional hardware tokens, or increasingly through mobile software tokens, has become the new normal. In the past, implementing and managing multifactor authentication deployments could be complex. FortiToken Cloud offers a secure, effective way to manage multifactor authentication (MFA) through an easy to understand, intuitive interface that can be securely accessed from anywhere. Best of all, our FortiToken Cloud service includes tokens for our FortiToken Mobile App with PUSH notification and response technology, simplifying the end user multifactor experience to a simply swipe or click to approve login.

## Highlights

### Centrally Manage MFA for FortiGate and Other Applications

You can configure and manage MFA for one or many FortiGates and other Fortinet security appliances as well as third party applications, all from a secure web interface. FortiToken Cloud offers additional features specifically for use by Managed Security Service Providers.

### Simplify Administration and Deployment, Increase Ease of Use

An intuitive web interface and FortiToken Mobile Tokens included, FortiToken Cloud Service reduces licensing and deployment complexity.

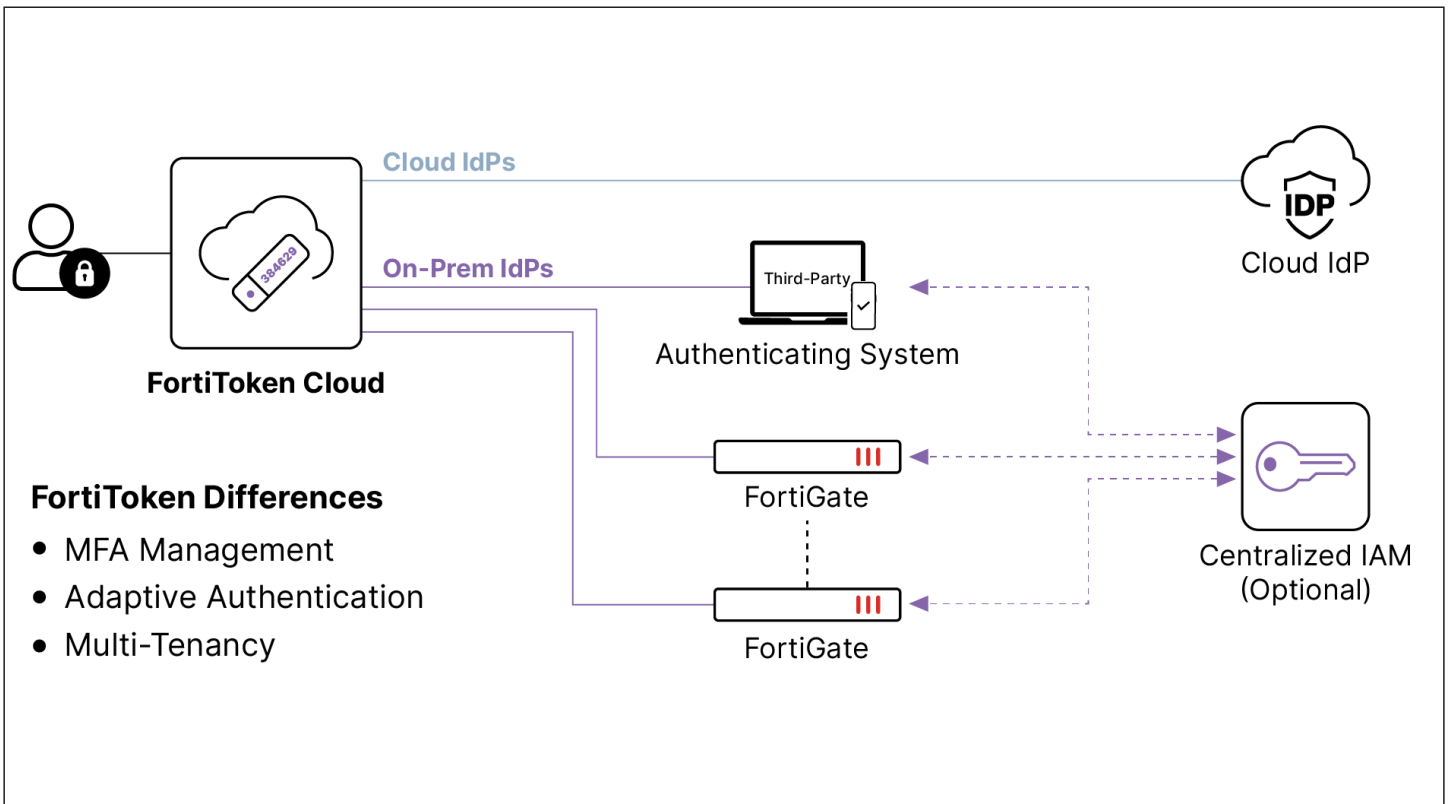

### No Additional Hardware or Software Required

Designed for FortiGate, FortiToken Cloud Service requires no changes in security policies or ACLs.

### Ease of Provisioning for Increased Demand

With daily usage reports and email notifications of low balance, you are always aware of the health of your deployment. Stackable subscriptions make expanding your deployment easy.

## Highlights

### Simple to Deploy and Manage

As the second factor, FortiToken Cloud works with the FortiGate and does not interfere with the initial user name and password login process. There is no additional hardware or software required. It is easily configured in the FortiGate and does not require you to add or change existing security policies. For non-Fortinet environment, any authenticated web application can use FortiToken Cloud MFA service by calling its APIs.

From the intuitive dashboard you are able to quickly assess the number of active users, your SMS balance, and the number of days until expiration. The system will alert you if your account is near expiration to prevent any interruption of service.

### Pricing

FortiToken Cloud is a subscription service available through the purchase of time-based licenses. Licenses are consumed based on the number of MFA cloud service users per year. It includes 125 SMS credits per user with an option to purchase additional SMS credits. All licenses are stackable with co-termed renewals. FortiToken Cloud can easily expand as your needs change.

### Scalable

Administrators are able to manage multifactor deployments from anywhere there is an internet connection. As a Fortinet hosted service, FortiToken Cloud combines the high availability and performance necessary for the most demanding enterprises.

The FortiToken Cloud interface supports the segmentation necessary for Managed Service Providers to create MFA offerings for their customers. Users and FortiGate appliances can be spread across the world or in the same data center and be part of the same managed group.

### FortiToken Mobile

The mobile application has revolutionized multi-factor authentication. Now with almost any mobile device (iPhone, Android, Windows Mobile, and Windows Universal Platform) your end users can download and utilize FortiToken Mobile. Offering superior ease of use and without additional hardware other than their mobile device, users now can utilize multi-factor with just the swipe or click of a finger to accept the secure token.

---

## FortiToken Cloud Features

### Highly Available Secure Managed Service

- Hosted in Fortinet Data Center
  - 24/7 monitoring
  - Realm support to effectively allocate resources and better manage end users
  - Support for multiple MFA options: FortiToken Mobile, email, SMS, and FortiToken (hardware token)
- 

### FortiToken Mobile Push

- Login details pushed to phone for one-tap approval
  - View login details and approve or deny with one tap
  - Available on iPhone and Android platforms
  - Simple app install and activation
- 

### MFA Service Integrated with FortiGate and Other Products

- Protect local and remote FortiGate admin, firewall, and VPN users
  - Open API to use with any web-based application
  - Integration with FortiGate, FortiAuthenticator, FortiPAM, FortiSandbox, and FortiADC out of the box
  - No additional hardware or software to purchase, install, and maintain
  - Add users directly from FortiGate
  - Remote FortiGate user support
- 

### FortiToken Mobile Token Codes

- One-time token codes generated by mobile application
- Support for iPhone, Android, and Windows platforms
- Operate without cell service or WiFi connection
- Secure cross-platform token transfer for iOS and Android devices

## Ordering Information

Product	SKU	Description
FortiToken Cloud	FC1-10-TKCLD-445-01-DD	One year FortiToken Cloud subscription for up to 25 users (includes 3125 SMS credits and 24×7 FortiCare Support per year).
	FC2-10-TKCLD-445-01-DD	One year FortiToken Cloud subscription for up to 100 users (includes 12 500 SMS credits and 24×7 FortiCare Support per year).
	FC3-10-TKCLD-445-01-DD	One year FortiToken Cloud subscription for up to 500 users (includes 62 500 SMS credits and 24×7 FortiCare Support per year).
	FC4-10-TKCLD-445-01-DD	One year FortiToken Cloud subscription for up to 2000 users (includes 250 000 SMS credits and 24×7 FortiCare Support per year).
	FC5-10-TKCLD-445-01-DD	One year FortiToken Cloud subscription for up to 10 000 users (includes 1 250 000 SMS credits and 24×7 FortiCare Support per year).
	FTC-SMS-2500	License for 2500 SMS credits. One or more SMS credits may be consumed per SMS message sent based on Country Code. License must be activated within one year of purchase. Unused SMS credits expire three years after the date of activation.
	FTC-SMS-10K	License for 10 000 SMS credits. One or more SMS credits may be consumed per SMS message sent based on Country Code. License must be activated within one year of purchase. Unused SMS credits expire three years after the date of activation.
	FTC-SMS-25K	License for 25 000 SMS credits. One or more SMS credits may be consumed per SMS message sent based on Country Code. License must be activated within one year of purchase. Unused SMS credits expire three years after the date of activation.
